Subject Index

AIDS
classification of HTLV-III/LAV-related diseases, 1095
disinfection and inactivation of HTLV-III/LAV, 400
elevated levels of interferon-induced 2'–5' oligoadenylate synthetase, 466
incidence in San Francisco, 1980–1983, 152
patients
and immunocompromised homosexual men, humoral responses to *P. carinii*, 838
marked deficiency in biochemical response to interferon, 457
presence of defective reticuloendothelial system Fc-receptor, 409
selective defects in lymphocyte proliferation and interferon release induced by CMV or mitogen, 727
with HLA-restricted, CMV-specific cytotoxic T cells and NK cells, 627
toxoplasmosis, treatment with difluoromethylornithine and formycin B, 1101
AIDS-related retroviruses, recovery from populations at-risk for AIDS, 734
Abscesses, experimental, due to *S. aureus*, in vitro migration and adherence of neutrophils, 903
Abscesses, nosocomial intraabdominal, caused by coagulase-negative staphylococci, 1091
Acyclovir, resistance to in HSV-infected cells, screening test using uptake of [^{125}I]iododeoxycytidine, 1206
Adenovirus, intermediate type, from a child with fulminant hepatitis, 844
Adherence
of *Candida* to vascular endothelial cells in culture, mechanisms and cell penetration, 1264
of *C. albicans* related to pathogenesis of endocarditis, study with adherence-negative mutants, 710
Adherence deficiency in leukocytes, heritable, associated with glycoproteins LFA-1, Mac-1, and p150,96, 661, 668
Adherence factor
in enteropathogenic *E. coli* detected with a DNA probe, 560
in enterotoxigenic *E. coli*, ELISA for detection, 1206
Aerosolized chick embryo fibroblast measles vaccine, effectiveness in infants of seven months or older, 1231
Alveolar macrophages, human, role in phagocytosis and killing of common respiratory pathogens, 4
Aminoglycosides
encapsulated in stable plurilamellar vesicles for treatment of brucellosis, 529
resistance
in *P. aeruginosa*, epidemiology and therapeutic implications, 769
in *S. aureus* mediated by conjugative R plasmids, 43
Amoxicillin, as single dose or in combination with gentamicin for treatment of experimental endocarditis, 83
Amphotericin B, distribution and activity in humans, 1037
Ampicillin
and co-trimoxazole, changing patterns of resistance of *Shigella* serotypes in Bangalore, 1348
for typhoid in mice, relapse following cessation related to virulence of infecting organism, 1044
increase in resistance in *S. dysenteriae* in Bangladesh, 1114
Anthrax, intestinal, bacteriological investigations, 1357
Antibiotic administration, intermittent vs. continuous ceftazidime for *K. pneumoniae* pneumonia in rats, 373
Antibiotic resistance
in enteric bacterial pathogens in developing countries, 1103
unstable, in *S. epidermidis* isolated in an outbreak of prosthetic valve endocarditis, 50
Antibodies to CMV in patients in Saudi Arabia, 1351
Antibody response
to hepatitis A virus, IgM neutralizing antibody, 1353
to membrane antigen gp 250 in EBV infection, diagnostic significance, 222
to vaccination against poliovirus, 1238
to zoster, significance of certain IgA antibodies, 230
Antibody to *C. trachomatis* and connection with tubal infertility, 1275
Antibody to *G. lamblia*, levels in different populations of lactating women, 1025
Antibody-dependent cell-mediated cytotoxicity, role in killing of fibroblasts infected with HSV, 1197
Antigen cross-reactivity in different serogroups of *L. pneumophila*, 1007
Antigen specificity of *T. gondii*, IgM and IgG antibodies in mothers and their congenitally infected newborns, 1020
Antigenic variation in *T. vaginalis* shown by monoclonal antibodies and IFA, 979
Antimicrobial resistance, conjugative R plasmids mediating resistance in *S. aureus*, 43
Antimicrobial resistance, increasing resistance of *E. coli* to TMP-SMZ in isolates from developing countries, 1107
Arachidonic acid incorporation by microfilariae of *B. malayi*, 1317
Argentine hemorrhagic fever, experimental in rhesus macaques, virus strain-dependent response, 218
Aspergillosis, invasive,
diagnosis by an ELISA for circulating antigen, 946
mechanisms of resistance of *A. fumigatus* conidia to killing by neutrophils in vitro, 33
Aspergillus fumigatus, mechanisms of resistance of conidia to killing by neutrophils in vitro, 33
Aspergillus
infections complicating pulmonary sarcoidosis, 1360
usefulness of respiratory cultures in diagnosis of pulmonary infection, 572
Attenuation, association of alteration of the cell wall of *H. influenzae* with attenuated virulence, 485
Auxotype of *N. gonorrhoeae*, correlation with protein 1 type and expression of disease, 339

Babesiosis, occurring with Lyme disease, serological evidence, 473
Bacillus anthracis, intestinal infection and bacteriological identification, 1357
Bacteremia
caused by *S. enteritidis* in childhood, 185
due to *H. influenzae* type b, pathogenesis of intravascular replication, 307
due to *Shigella*, prevalence and implications, 784
Bacteremia, gram-negative, and bacterial translocation in leukemic patients, 99
Bacterial lipopolysaccharides, gram-negative, effect of host fac-

tors on fate after iv injection into rats, 177
Bacterial shock, role of surface structures of *E. coli* in induction of the early phase, 493
Bacterial vaginosis
and vaginal redox potential, 379
comparison of identification methods for *Mobiluncus* spp., 65
Bacteroides fragilis, enterotoxigenic association with diarrheal disease in calves, 1344
Beta-lactams
and inhibition of granulopoiesis in vivo and in vitro, 90
hypersensitivity in children given penicillin G at birth, 1074
with and without aminoglycoside, for prophylaxis of experimental endocarditis in rats, 83
Beta-lactamase plasmids, detection with DNA-hybridization in patients with *N. gonorrhoeae* infections, 59
Betaine, osmoprotective property for bacteria, 1308
Bilharzia, colonic polyps treated with praziquantel, 1316
Body temperature, accurate measurement with infrared thermometry, 301
Bordetella pertussis, characterization of two adhesins for human ciliated respiratory-epithelial cells, 118
Borrelia burgdorferi
analysis of heterogeneity of major proteins of North American and European isolates, 478
characterization of lipopolysaccharide, 108
Boutonneuse fever, subclinical infections in Western Sicily, 651
Brucella abortus
isolation of components responsible for inhibition of bovine neutrophil function, 913
treatment with aminoglycosides encapsulated in stable plurilamellar vesicles, 529
Brucella canis, treatment with aminoglycosides encapsulated in stable plurilamellar vesicles, 529
Brucellosis
human, treatment with co-trimoxazole vs. tetracycline-streptomycin, 1358
treatment with aminoglycosides enclosed in stable plurilamellar vesicles, 529
Brugia malayi, incorporation of arachidonic acid by microfilariae, 1317

Calcium, role with phospholipase A in the cytopathogenicity of *E. histolytica*, 542
Calicivirus, human, causing gastroenteritis in infants, humoral immunity, 274
Campylobacter jejuni
heat-labile enterotoxin, serum antibodies in children, 413
in point-source outbreak of illness associated with consumption of raw milk, 592
infection, recurrent, and hypogammaglobulinemia, 1099
Campylobacteriosis
point-source outbreak associated with consumption of raw milk, 592
white blood cell counts in patients and controls, 427
Candida albicans
causing endocarditis, pathogenesis of adherence-negative mutants, 710
oral carriage associated with high number of circulating suppressor T cells, 1356
Candida, adherence to cultured vascular endothelial cells, mechanisms and cell penetration, 1264
Candidiasis
in heroin addicts, clinical and therapeutics of ocular, cutaneous, and osteoarticular infections, 577
Capnocytophaga
as a pathogen in immunocompetent hosts, 233
infections in normal and immunocompromised hosts, 1098
Carbenicillin, lipopolysaccharide as a determinant of permeability in *P. aeruginosa*, 351
Cardiac glycosides, digoxin disrupts host defense against pneumococcal pneumonia, 14
Cat-scratch disease, electron microscopy of causative bacillus, 643
Ceftazidime, therapeutic regimen and effect on *K. pneumoniae* pneumonia in rats, 373
Ceftriaxone, compared with TMP-SMZ for treatment of chancroid in Thailand, 1002
Cell lines, certified, of rat origin, absence of Hantavirus infection, 1082
Cell-mediated
cytotoxicity, antibody-dependent, role in killing of fibroblasts infected with HSV, 1197
immune response, antigen-specific, in cynomolgus monkeys to *R. tsutsugamushi*, 739
Central nervous system, viral infections, and interferons in the CSF, 1098
Chancroid in Thailand, comparative study of treatment with ceftriaxone on TMP-SMZ, 1002
Chemotaxis of neutrophils, in response to experimental abscess formation, 903
Chlamydia attached to spermatazoa, 854
Chlamydia trachomatis
detection of multiple serovars in genital infections, 985
immunotyping with monoclonal antibodies, 791
infection
causing trachoma, workshop report on research priorities, 383
screening in an inner-city population, comparison of diagnostic methods, 419
role in tubal infertility, 1275
Chloramphenicol, acute myocardial effects in newborn pigs and possible link to gray baby syndrome, 344
Chloroquine-resistance in *P. falciparum* in East Africa and importation of malaria into the USA, 613
Cholera patients in Jakarta, comparison of rehydration solutions and maintenance therapy, 1159
Ciprofloxacin
efficacy in experimental arthritis caused by *E. coli*, in vivo–in vitro correlations, 811
for selective decontamination of the gastrointestinal tract in leukemic patients, 104
Clonorchis/Opisthorchis infections, trial of treatment with praziquantel, 637
Colonization factor antigens and enterotoxin, occurrence in fecal isolates of *E. coli*, as prospective study, 1128
Complement deficiency (C5), role in experimental paracoccidioidomycosis in mice, 425
Complement deficiency and natural serum bactericidal activity in disseminated infections with *N. meningitidis*, 1322
Complement function related to serum opsonic activity for *S. pneumoniae* in sickle cell disease, 701
Congenital defects due to reactivated CMV infection during

pregnancy, 621
Corynebacteria, JK group, similarity to cutaneous lipophilic diphtheroids, 801
Co-trimoxazole
and ampicillin, changing patterns of resistance of *Shigella* serotypes in Bangalore, 1348
vs. tetracycline-streptomycin for treatment of human brucellosis, 1358
Coxiella burnetii, as causative agent of Q fever, specific lymphocyte nonresponsiveness in endocarditis, 1283
Cryptococcal pericarditis in an iv drug abuser, 842
Cyclosporine and CMV infection in recipients of heart or heart-lung transplants, 1182
Cytomegalovirus
antibodies in patients in Saudi Arabia, 1351
epidemiology
and transmission, 243
of infection in women attending an STD clinic, 597
human
rapid determination of molecular relatedness of isolates, 755
rapid detection in the urine of humans, 631
sensitivity to 9-(1,3-dihydroxy-2-propoxymethyl)guanine, 833
infection
epidemiology in a heterogeneous population of pregnant women, 249
in heart or heart-lung transplant recipients receiving cyclosporine, 1182
in teenagers in Texas, 1350
latent murine
activation by cardiac explant and cell cultures, 625
congenital defects due to reactivation during pregnancy, 621
murine, source in mice receiving kidney allografts, 1192
serological heterogeneity with a monoclonal antibody, 648
transmission in day care centers, molecular epidemiology, 760
Towne strain does not induce latency, 395
Cytomegalovirus-induced mononucleosis, phenotypic properties of atypical lymphocytes, 198
Cytomegalovirus-specific cytotoxic T cells and NK cells, HLA-restricted, in patients with AIDS, 627
Cytopathology of viruses in the absence of cytolysis, 665

Delta agent, associated with hepatitis B infection, presence of autoantibodies to thymic epithelial cells, 232
Delta infection, nonpercutaneous spread, 845
Diagnosis of *C. trachomatis* infections, comparison of assays in screening of an inner-city population, 419
Diarrhea
caused by rotavirus, epidemiology in a prospectively monitored American Indian population, 778
due to *C. jejuni* infection, serum antibodies to heat-labile enterotoxin in children, 413
Difluoromethylornithine and formycin B in toxopolasmosis, 1101
Digoxin, disruption of host defense against pneumococcal pneumonia, 14
Diphtheroids, cutaneous lipophilic, similarity to JK group corynebacteria, 801
Disinfection and inactivation of HTLV-III/LAV, 400
DNA probe
for detection of an adherence factor in enteropathogenic *E. coli*, 560
for identification of *Mobiluncus* species compared with identification by gram stain and culture, 65
Drug resistance, multiple, in *S. pneumoniae* and tolerance to penicillin, 365

ELISA, for detection of IgG antibodies to *S. aureus* lipase in staphylococcal infections, 286
Ebola virus, pathophysiology of shock and hemorrhage during fulminating infection in monkeys, 887
Echovirus-12, probit analysis of data for infection, 649, 650
Editors' Choice
antigenic variation in trypanosomes, 855
malaria sporozoite vaccine, 655
prions, amyloid, and heresy, 431
rabies, molecular biology of nerve invasion, 1362
Electron microscopy, solid-phase immune, for serotyping rotavirus strains, 1143
Encephalitis, tick-borne, in Central Europe, assessment of risk, 650
Endocarditis
bacterial, in rats, prophylaxis with single-dose amoxicillin or amoxicillin and gentamicin, 83
due to *C. albicans*, studies of pathogenesis in infections with adherence-negative mutants, 710
due to Q fever, specific lymphocyte nonresponsiveness, 1283
Endonuclease-digestion analysis of DNA from species of *Giardia*, 64
Entamoeba histolytica
description and subcellular localization of phospholipase A enzymes, 536
effects of antagonists of calcium and phospholipase A on cytopathogenicity, 542
Enteric bacterial pathogens, antibiotic resistance in developing countries, 1107
Enteroadhesiveness, encoded by a plasmid in enteropathogenic *E. coli*, controls the diarrheal response of humans, 550
Enterobacteriaceae causing bacteremia, in patients with leukemia, 99
Enterotoxigenic
B. fragilis, association with diarrheal disease in calves, 1344
E. coli
ELISA for detection of adhesion factor antigens, 1120
effect of tetracycline on attachment to porcine small-intestinal cells, 1032
stool blot techniques using DNA probes, 1087
Enterotoxin and colonization factor antigens, occurrence in fecal isolates of *E. coli*, prospective study, 1128
Epidemiology
of aminoglycoside resistance in *P. aeruginosa* and its therapeutic implications, 769
of cytomegalovirus infection, 243
of cytomegalovirus infection in a heterogeneous population of pregnant women, 249
of hemorrhagic fever with renal syndrome in China, 137
of leprosy in the United States, 1971–1981, 1064
of rotavirus diarrhea in a prospective monitored American Indian population, 778
of rotavirus diarrhea in children in rural Costa Rica, 1134

of VZV infection in bone marrow transplant recipients, 1172
Epstein-Barr virus
development of large granular lymphocytes after infection in owl monkeys, 1352
role of primary infection in posttransplantation lymphoma and lymphoproliferative lesions, 876
specific membrane antigen gp 250 and diagnostic significance of antibodies in humans, 222
Erythematous rash and erythema infectiosum, etiologic role of human parvovirus infection, 257
Erythromycin for nonstreptococcal pharyngitis in adults, a controlled trial, 1093
Escherichia coli
colonization factor antigens on fresh isolates, a prospective study, 1128
enteropathogenic
detection of adherence factor with a DNA probe, 560
plasmid encoding enteroadhesiveness controls diarrheal response in humans, 550
enterotoxigenic
effect of tetracycline on attachment to porcine small-intestinal cells, 1032
ELISA for the detection of adhesion factor, 1120
stool blot technique using DNA probes, 1087
experimental arthritis, efficacy of ciprofloxacin, in vivo–in vitro correlations, 811
O157:H7
a screening method for a 12-month stool survey, 775
causing diarrhea in infant rabbits, 1341
J5, cross-reactivity of antibodies to LPS and other gram-negative bacteria, 954
P fimbriated, in adults with acute pyelonephritis, 426
resistance to TMP-SMZ increasing in prevalence in developing countries, 1107
role of surface structures and inflammatory mediators in the early hypotensive phase, 493
Exoenzyme S, role in infections with *P. aeruginosa*, 716

Fasciola hepatica, successful treatment of severe infection with praziquantel, 1339
Fc-receptor, defective in reticuloendothelial system of AIDS patients, 409
Fecal flora, effect of selective decontamination with ciprofloxacin in patients with acute leukemia, 104
Fenoprofen, effects on neutrophil adherence, 690
Fever, detection with infrared thermometry, 301
Fibronectin and gammaglobulin enhancement of phagocytosis by neonatal monocytes of type III GBS, 695
Filariasis, incorporation of arachidonic acid by the microfilariae of *B. malayi*, 1317
Formycin B and difluoromethylornithine in toxoplasmosis, 1101
Fungal infections
complicating pulmonary sarcoidosis, 1360
diagnosis of invasive aspergillosis by an ELISA for circulating antigen, 946
in immunocompromised patients, comparison of treatment with ketaconazole or nystatin, 1257
therapy with amphotericin B, its distribution and activity in humans, 1037
Fungal susceptibilities to ketoconazole in vitro, susceptibilities of systemic and pathogenic fungi, 1249
Fungal viability, rapid colorimetric assay with the tetrazolium salt MTT, 938

Gastroenteritis
due to calicivirus, humoral immunity in infants, 274
due to *S. enteritidis* and association of bacteremia in children, 185
due to Snow Mountain agent in Vermont, 834
due to rotavirus
anamnestic fecal IgA response after infection, 398
detection by dot-blot hybridization, 293
Genetic resistance of mice to chronic pyelonephritis due to *S. faecalis*, 416
Genital infections with *C. trachomatis*, detection of multiple serovars, 985
Gentamicin, lipopolysaccharide as a determinant of permeability in *P. aeruginosa*, 351
Gentamicin, low concentrations, synergism with penicillin in the killing of group B streptococci, 515
Giardia antigens, differences in excretory-secretory products and surface antigens in 19 isolates, 1166
Giardia, isolates obtained from humans and animals, restriction-endonuclease analysis of DNA, 64
Giardia lamblia antibodies, prevalence in serum and milk in different populations of lactating women, 1025
Giardiasis, differentiation of strains of *Giardia* with endonuclease-digestion analysis of DNA, 64
Glycoproteins LFA-1, Mol, and p150,95, related to leukocyte adherence, 661
Gonococcal infections, role of serum exposure to neutrophil association, 330
Gonorrhea
antigen-antibody specificity in the immune response, 990
correlation of auxotype and protein I type with expression of disease, 339
detection of β-lactamase plasmids in strains of *N. gonorrhoeae* by using a DNA-hybridization method, 59
Gram stain and culture of sputum for diagnosis of bacterial pneumonia, 1096
Granulopoiesis, inhibition by β-lactam antibiotics in vivo and in vitro, 90
Gray baby syndrome, possible link with acute myocardial effects of chloramphenicol in newborn pigs, 344
Group B streptococci
killing by synergism between penicillins and low concentrations of gentamicin, 515
type III, enhancement of phagocytosis by neonatal monocytes, 695

Haemophilus influenzae
identification of a specific epitope on an outer membrane protein, 1300
type b
alteration of cell wall by transformation with cloned DNA, 485
bacteremia and role of intravascular replication in pathogenesis, 307
capsule occurrence of postimmunization antibody in breast milk, 407
opsonic activity in serum in immunized infants, 1076
vaccines consisting of capsular antigens associated with

protein, 634
Hamster cannibalism and transmission of scrapie, 971
Hantaan virus–related enzootic, isolated from feral rat in New Orleans, 126
Hantavirus infection, absence in certified cell lines of rat origin, 1082
Hemodialysis with processed dialyzers, occurrence of *M. chelonei* infections in users, 1013
Hemolytic anemia, chronic, aplastic crisis may be caused by human parvovirus infection, 257
Hemorrhage and shock in fulminating Ebola virus infection in monkeys, 887
Hemorrhagic colitis caused by *E. coli* O157:H7
  a new screening method used in a 12-month stool survey, 775
  a model in the infant rabbit, 1341
Hemorrhagic fever with renal syndome
  absence of Hantaviruses in certified cell lines of rat origin, 1082
  analysis of risk factors and mode of transmission in China, 137
  isolation of Hantaan virus–related enzootic from a feral rat, 126
Hemorrhagic fever, Argentine, experimental infection in rhesus macaques, virus strain–dependent response, 218
Hepatitis, fulminant, isolation of an intermediate type of adenovirus, 844
Hepatitis A virus
  IgM neutralizing antibody, 1353
  infection and interferon response, 211
Hepatitis B
  abnormal immunologic response in two brothers, 1356
  immunoprophylaxis of infants born to HBsAg-positive carrier mothers, 817
  incidence in Tennessee prisoners, 214
  surface antigen–positive carrier mothers, immunoprophylaxis of HBV infection in infants, 817
  replication in adult carriers in an endemic area, 566
  vaccine, nonresponders, alterations in immune response, 1245
  virus
    nonpercutaneous spread of δ infection, 845
    sexual transmission, 231
Hepatitis B–associated delta infection, autoantibodies to thymic epithelial cells, 232
Hepatotoxicity, a potential side effect of ketaconazole, 233
Heroin addicts, clinical and therapeutic aspects of candidiasis, 577
Herpes simplex virus
  detection in women with acute pelvic inflammatory disease, 78
  immunology, 435
  immunity mediated by modulation of lymphokine activity, 449
  killing of infected fibroblasts, association with an elutable factor, 1197
  reactivation, site specificity of epithelial irritants, 841
  recurrent lesions and inhibition of lymphocyte proliferative responses, 441
  type 1, classification of subtypes in Japan, 190
  uptake of [^{125}I]iodode oxycytidine, screening for resistance to acyclovir, 120€
Herpes zoster, significance of specific IgA antibodies in serum as early diagnosis, 230
Herpesvirus immunology, response to HSV, 435
Hot-tap water systems, and presence of *L. pneumophila*, 145
Human T lymphotropic virus type III/lymphadenopathy-associated virus
  disinfection and inactivation, 400
  in illicit drug abusers in New York city, 843
  related diseases, classification, 1095
Hypersensitivity. delayed-type, antigen-specific supression in human tuberculosis by monocytes, 177

[^{125}I]Iododeoxycytidine, uptake by HSV-infected cells as a screening test for resistance to acyclovir, 1206
Ibuprofen, effects on neutrophil adherence, 690
IgA antibody to *H. influenzae* type B capsule in breast milk, 407
Immune response
  antigen-specific, cell-mediated, in cynomolgus monkeys to *R. tsutsugamushi*, 739
  following rotaviral infection in infants, 398
  in infants, with gastroenteritis caused by calicivirus, 274
  of nonresponders to HBV vaccine, 1245
  to a new adsorbed rhesus diploid rabies vaccine derived from FRhL-2 cells, 204
  to *G. lamblia*, comparison of antibody levels in different populations of lactating women, 1025
  to *H. influenzae* type B capsule, postimmunization antibody in breast milk, 407
  to heat-labile enterotoxin of *C. jejuni* in children, 413
  to HSV in reactivated infections, 449
  to *N. gonorrhoeae*, antibody-antigen specificity, 990
  to RSV, in vivo and in vitro response to human mononuclear leukocytes to infection, 895
  to rotavirus, passively acquired, in neonatal mice, dependence on serotype and antibody titer, 1152
  to rough gram-negative mutants, cross-reactivity of antibodies in rabbits, 954
  to vaccines to human parainfluenza virus type 3, 1219
  to varicella vaccine compared with that to natural infection, 863
Immunity to varicella-zoster virus, testing with an intradermal skin test, 869
Immunization against *H. influenzae* type b, subsequent opsonic activity in serum, 1076
Immunization for adults, 1
Immunoassay, solid-phase, to distinguished serotypes of *L. pneumophila* in urine, 1007
Immunobiologic failures and presence of rotaviruses, 1354, 1355
Immunocompromised hosts
  neutralization of varicella-zoster virus with human monoclonal antibodies, 280
  recurrent infection with *C. jejuni* and hypogammaglobulinemia, 1099
  viral infections in childhood leukemia, 266
  water-related nocosomial pneumonia due to *L. pneumophila* serogroups 1 and 10, 356
Immunodeficient homosexual men with Kaposi's sarcoma, effect of human lymphoblastoid interferon, 162
Immunologic defect in two brothers to HBV, 1356
Immunosuppression in reovirus type 1 infections and requirement of the S1 gene, 640

Immunotherapy, passive, studies on RSV infections in the respiratory tract of a primate model, 1083
Infertility, tubal, the role of *C. trachomatis*, 1275
Influenza A
dose response to Washington/897/80 (H3N2) avian-human reassortant virus in human adults, 225
infection, associated acute parotitis, 853
virus vaccines, use in seronegative children, live cold-adapted vs. inactivated whole virus, 1212
Infrared thermometry, a feasibility study for detection of fever, 301
Interferon
human lymphoblastoid, for treatment of immunodeficient homosexual men with Kaposi's sarcoma, 162
marked deficiency in the biochemical response in patients with AIDS, 457
presence during bacterial otitis media, 428, 429
release and lymphocyte proliferation induced by CMV or mitogen, selective defects in AIDS patients, 727
system, response to hepatitis A virus infection, 211
types detected in the CSF of patients with viral infections of the CNS, 1098
Interleukin-1 production in vitro in human leishmaniasis, 315
Interstitial fluid, as improved method for measuring pharmacokinetics, 1328
Isospora belli, causing enteritis, unsuccessful treatment with spiramycin, 1336

JK group corynebacteria and their similarity to cutaneous lipophilic diphtheroids, 801
Junin virus infection, virus strain–dependent response in rhesus macaques, 218

Kaposi's sarcoma
in immunodeficient homosexual men treated with human lymphoblastoid interferon, 162
treatment with interferon and deficiency of biochemical response in patiens with AIDS, 457
Ketaconazole
compared with nystatin for prevention of fungal infection in immunocompromised patients, 1257
in vitro susceptibilities of clinical isolates of systemic and pathogenic fungi, 1249
potential hepatotoxicity, 233
Klebsiella pneumoniae experimental pneumonia in rats and efficacy of different regimens of ceftazidime, 373
Legionella pneumophila
antigens, cross-reactivity in urine of patients infected with different serogroups, 1007
contamination of residential hot-tap water systems, 145
Legionellosis
contamination of residential hot-tap water systems with *L. pneumophila*, 145
water-related nosocomial pneumonia, caused by *L. pneumophila* serogroups 1 and 10, 356
Leishmaniasis
antigen recognition by effector T cells in defense, 1057
human, parasite-monocyte interactions and production of interleukin-1 in vitro, 315
Leprosy
in the United States, 1971–1981, 1064
lepromatous, phenolic glycolipid I in sera of patients, 1078
Leukemia
childhood, and associated viral infections, 266
patients, occurrence of bacterial translocation and gram-negative bacteremia, 99
remission induction treatment, effect on fecal flora of administration of ciprofloxacin, 104
Leukocyte adherence deficiency, heritable, associated with glycoproteins LFA-1, Mac-1, and p150,95, 661, 668
Leukocytes, human mononuclear, infection with RSV in vivo and in vitro, 895
Lipopolysaccharide
from *B. burgdorferi*, chemical and biologic characterization, 108
gram-negative bacterial, effects of host factors on fate after iv injection in rats, 177
human monoclonal antibodies to LPS of *P. aeruginosa* serotype 5, 965
of *E. coli* J5 cross-reactivity, of antibodies to, and other gram-negative bacteria, 954
Lipoproteins, high-density, binding of gram-negative bacterial lipopolysaccharides after iv injection in rats, 177
Liver fluke
treatment of severe infection in a human with praziquantel, 1339
infection with *Clonorchis/Opisthorchis*, trial of treatment with praziquantel, 637
Lung infections, role of human alveolar macrophges in phagocytosis and killing of pathogens, 4
Lyme disease
borreliae, heterogeneity of major proteins from North American and European isolates, 478
chemical and biologic characterization of lipopolysaccharide from *B. burgdorferi*, 108
occurring with babesiosis, serological evidence, 473
Lymphocyte proliferation and interferon release induced by CMV or mitogen, selective defects in AIDS patients, 727
Lymphocyte subset ratios in nonresponders to HBV vaccine, 1245
Lymphocytes, large granular, development after EBV infection in owl monkeys, 1352
Lymphocytopathic retroviruses recovered from populations at-risk for AIDS, 734
Lymphokine activity, modulated by HSV reactivation, 449
Lymphoma, and lymphoproliferative lesions, posttransplantation, role of primary infection with EBV, 876
Lysosomal secretion from human macrophages, inhibition by tetanus toxin, 922

Macrophage secretion, human, inhibition by tetanus toxin, 922
Magnesium, effect on production of TSST-1 by *S. aureus*, 618
Major histocompatibility complex, genes within control natural resistance to typhoid in mice, 1050
Malaria sporozoite vaccine, Editor's Choice, 655
Malaria, *P. falciparum*, recent trends in the importation of malaria into the USA from Africa, 613
Measles vaccine, aerosolized, derived from chick embryo fibroblasts, effectiveness in older infants, 1231
Melioidosis in a West African child, 424
Meningitis
caused by *H. influenzae* type b, persistent pharyngeal colonization during therapy, 849

bacterial, mixed aerobic-anaerobic, associated with "spontaneous" pneumocephalus, 847
role of intravascular replication in the pathogenesis of bacteremia due to *H. influenzae* type b, 307
Meningococcal vaccines for infants, immunogenicity, 850
Milk, raw, consumption associated with point-source outbreak of campylobacteriosis, 592
Mobiluncus species, comparison of identification by gram stain, DNA probe, and culture, 65
Monoclonal antibodies
for immunotyping *C. trachomatis*, 791
human
that neutralize varicella-zoster virus, 280
to LPS of *P. aeruginosa* serotype 5, possible use as an immunotherapeutic agent, 965
Monocytes
effect of leishmanial infection on production of interleukin-1, 315
interaction with penicillin G in the killing of *S. aureus*, 521
Mononuclear cells
adherent, radiation-sensitive, antigen-specific suppression of human tuberculosis, 171
human, produce an inhibitor of neutrophil chemotaxis when exposed to *S. aureus*, 24
Mononucleosis, cytomegalovirus-induced, phenotypic properties of atypical lymphocytes, 198
Mycobacterium chelonei
causing nonpulmonary infections, treatment on the basis of in vitro susceptibilities, 500
causing pericarditis in a patient undergoing dialysis for chronic renal failure, 846
infections, in patients using processed dialyzers for hemodialysis, 1013
Mycobacterium leprae
epidemiology of leprosy in the United States, 1971–1981, 1064
phenolic glycolipid I in sera of patients with lepromatous leprosy, 1078
Mycoplasma pneumoniae, isolation from CSF of a patient with pneumonia and meningoencephalitis, 823
Myocardial effects, acute, of chloramphenicol in newborn pigs and possible link with gray baby syndrome, 344

Neisseria gonorrhoeae
effect of growth in serum on subsequent uptake by human neutrophils, 330
expression of disease correlated with auxotype and protein I type, 339
infection, antibody-antigen specificity in the immune response, 990
penicillinase-producing, detection of African and Asian strains in men with urethritis, 59
Neisseria meningitidis
group C, immunogenicity of *O*-acetyl negative polysaccharide vaccines in infants, 850
natural serum bactericidal activity to isolates from disseminated infections, 1332
Neonatal infections, opsonic defense to *S. epidermidis* in premature neonates, 930
Neonatal microbial flora and prophylaxis with penicillin G, 1070
Neutropenia caused by β-lactam antibiotics in vivo and in vitro, 90
Neutrophil
adherence and the influence of nonsteroidal anti-inflammatory agents, 690
chemotaxis, inhibition by human mononuclear cells exposed to staphylococci, 24
function, bovine, isolation of components of *B. abortus* responsible for inhibition, 913
killing of *A. fumigatus* conidia in vitro, mechanisms of resistance, 33
migration and adherence in vitro and localization of experimental abscesses, 903
response in infection with *N. gonorrhoeae*, 330
Nonsteroidal anti-inflammatory agents and their effects on neutrophil adherence, 690
Nucleic acid hybridization for detection of rotaviruses, dot-blot assay, 293
Nystatin compared with ketoconazole for prevention of fungal infection in immunocompromised patients, 1257

2′–5′ Oligoadenylate synthetase
elevated levels of interferon-induced enzyme in patients with AIDS, 466
levels during interferon therapy of patients with AIDS and Kaposi's sarcoma, 457
Onchocerca volvulus causing onchocerciasis, workshop report on research priorities, 389
Opsonic defense in premature neonates to *S. epidermidis* infection, 930
Osmoprotectivity of urine and betaine for bacteria, 1308
Otitis media, bacterial, presence of interferon, 428, 429
Outer membrane protein of *H. influenzae*, identification of specific epitope, 1300
Oxygen metabolites and comparison of, killing of group B streptococci and *S. aureus*, 323

Paracoccidioidomycosis, experimental murine, role of C5, 425
Parainfluenza virus type 3, human, characterization and evaluation of glycoproteins as a subunit vaccine, 1219
Parasitology, malaria sporozoite vaccine, 655
Parotitis, acute, associated with influenza A infection, 853
Parvovirus infection, experimental, in humans, 257
Pelvic inflammatory disease, acute, isolation of herpes simplex virus from upper genital tract, 78
Penicillin G, interaction with monocytes in killing of *S. aureus*, 521
Penicillin
given at birth, and subsequent hypersensitivity to β-lactams, 1074
prophylaxis and neonatal microbial flora, 1070
tolerance in multiply drug-resistant isolates of *S. pneumoniae*, 365
synergism with low concentrations of gentamicin in the killing of group B streptococci, 515
Penicillinase-producing *N. gonorrhoeae*, identification with a DNA-hybridization method, 59
Pentamidine, a new bioassay to study pharmacokinetics, 750
Pericarditis caused by *M. kansasii* in a patient undergoing dialysis for chronic renal failure, 846
Pericarditis caused by *Cryptococcus* in an iv drug abuser, 842

Perspectives
adherence deficiency in leukocytes lacking glycoproteins LFA-1, Mol, and p150,95, 661
antibiotic resistance in enteric bacterial pathogens in developing countries, 1103
epidemiology and transmission of cytomegalovirus, 243
HSV immunology, 435
live attenuated varicella vaccine, 859
Phagocytic dysfunction related to heritable deficiency of glycoproteins LFA-1, Mac-1, and p150,95, 668
Phagocytosis and type III GBS by neonatal monocytes, enhancement by fibronectin and gammaglobulin, 695
Pharmacokinetics
of pentamidine, study by new bioassay, 750
in interstitial fluid, an improved method for determination, 1328
Pharyngitis, nonstreptococcal, a controlled trial of treatment with erythromycin in adults, 1093
Phospholipase A and calcium, effects of antagonists on the cytopathogenicity of *E. histolytica*, 542
Phospholipase A enzymes of *E. histolytica*, description and localization, 536
Plasmid encoding enteroadhesiveness controls the diarrheal response in humans to enteropathogenic *E. coli*, 550
Plasmodium falciparum, recent trends in importation of malaria into the USA from Africa, 613
Pneumocephalus, "spontaneous", associated with mixed aerobic-anaerobic bacterial meningitis, 847
Pneumococcal pneumonia, experimental in mice, disruption of inflammatory response by digoxin, 14
Pneumocystis carinii
humoral responses in patients with AIDS and immunocompromised homosexual men, 838
pneumonia, study of pentamidine pharmacokinetics in new bioassay, 750
Pneumonia
bacterial, diagnosis with gram stain and culture of sputum, 1096
experimental pneumococcal, in mice, disruption of inflammatory response by digoxin, 14
mycoplasma, and meningoencephalitis, isolation of *M. pneumoniae* from the CSF, 823
nosocomial water-related, caused by *L. pneumophila* serogroups 1 and 10, 356
pneumococcal, accuracy of diagnosis with sputum examination, 1097
Poliovirus vaccination, secretory and serum immunoglobulin class-specific antibodies, 1238
Polysaccharide
antigens of *P. aeruginosa*, a new antigen common to different strains, 1290
capsule in *H. influenzae* and alterations associated with attenuation of virulence, 485
extracellular, terminology in *P. aeruginosa*, 652
on the surface of *E. coli* and their role in induction of the early hypotensive phase, 493
Postpartum rubella immunization, association with sequelae, 597
Praziquantel
for treatment of *S. haematobium* infection, reduction in pathological findings, 807
for treatment of bilharzial colonic polyps, 1360
for severe infection with *F. hepatica*, 1339
trial of treatment for *Clonorchis/Opisthorchis* infections, 637
Prions, role in slow virus disease, Editors' Choice, 431
Prisoners in Tennessee, and incidence of hepatitis B, 214
Probit analysis of data for Echovirus-12 infection, 649, 650
Prospect Hill virus, isolated from meadow voles in the USA, partial characterization, 826
Prosthetic value endocarditis, caused by *S. epidermidis*, instability of antibiotic resistance in organism, 50
Pseudomonas aeruginosa
aminoglycoside resistance, epidemiology and implications for therapy and control, 769
causing bacteremia in leukemic patients, 99
detection of a common polysaccharide antigen in different strains, 1290
evidence for involvement of LPS in permeability to carbenicillin and gentamicin, 351
in vitro dissociative behavior, 852
infections, role of exoenzyme S, 716
serotype 5, human monoclonal antibody to LPS, possible use for immunotherapy, 965
terminology related to extracellular polysaccharides, 652
Pseudomonas pseudomallei infection in a West African child, 424
Pulmonary infection due to *Aspergillus*, usefulness of respiratory cultures, 572
Pyelonephritis
acute, caused by P fimbriated *E. coli* in adults, 426
chronic, experimental, strain-dependent differences in susceptibility of mice, 416
Pyrometers, infrared, for accurate measurement of body temperature, 301

Q fever, cellular immunity, specific unresponsiveness of lymphocytes in endocarditis, 1283

R plasmids, conjugative, in resistance of *S. aureus* to antimicrobial agents, 43
Rabies vaccine, adsorbed rhesus diploid derived from FRhL-2 cells, 204
Rabies, molecular biology of viral interaction with nerves, Editors' Choice, 1362
Rapid detection of human CMV in the urine of humans, 631
Rapid identification of species of *Mobiluncus* by using DNA probes, 65
Rehydration and maintenance therapy in cholera patients in Jakarta, comparison of rehydration solutions, 1159
Renal transplantation and source of CMV infection in mice, 1192
Reovirus type 1, the requirement of the S1 gene for immunosuppression, 640
Resistance to TMP-SMZ and ampicillin in *S. dysenteriae* type 1 and *S. flexneri* in Bangladesh, 1114
Respiratory cultures, usefulness in diagnosis of pulmonary infection caused by *Aspergillus*, 572
Respiratory-epithelial cells, human ciliated, specific adhesins of *B. pertussis* for these cells, 118
Respiratory infections, role of human alveolar macrophages in phagocytosis and killing of pathogens, 4
Respiratory syncytial virus infection
in human mononuclear leukocytes, 895

studies of passive immunotherapy in the respiratory tract of a primate, 1083
Restriction endonuclease digests for rapid determination of relatedness of human CMV isolates, 755
Restriction endonuclease analysis and distribution of herpes simplex virus type 1 in Japan, 190
Retroviruses associated with AIDS recovered from at-risk populations, 734
Rhinoviral infection, experimental, effect of virucidal paper handkerchiefs on transmission, 403
Rickettsia tsutsugamushi in cynomolgus monkeys, development of antigen-specific cell-mediated immune responses, 739
Rotavirus
and immunobiologic failure, 1354, 1355
assay compared with avidin-biotin amplified assay for detection of rotavirus, 647
detection
by nucleic acid hybridization and cloned DNA of simian rotavirus SA-11 genes, 293
comparison of Rotazyme assay with avidin-biotin amplified assay, 647
in stool specimens by enzyme immunoassay, 830
diarrhea, epidemiology in a prospectively monitored American Indian population, 778
human, characterization and prevalence of strains, 1143
infection
of infants, anamnestic response in fecal IgA production, 398
in children, 646, 647
occurrence in children in rural Costa Rica, 1134
neonatal immunity in mice is dependent on serotype and titer of maternal antibody, 1152
Rubella, postpartum immunization, association with development of sequelae, 597

S1 gene in reovirus type 1 is required for immunosuppression, 640
Salmonella enteritidis, bacteremia in childhood, 185
Salmonellae
and other gram-negative bacteria, interaction with *S. japonicum*, 722
infection in mice, natural resistance to typhoid controlled by major histocompatibility complex, 1050
of differing virulence causing mouse typhoid, relapse following cessation of antibiotic therapy, 1044
Salmonellosis associated with
schistosomiasis in vivo and in vitro, 722
gastroenteritis and bacteremia caused by *S. enteritidis* in children, 185
Salpingitis in acute pelvic inflammatory disease, associated with isolation of herpes simplex virus, 78
Sarcoidosis, pulmonary, and complicating fungal infections, 1360
Schistosoma haematobium, reduction of pathological findings after treatment with praziquantel, 807
Schistosoma japonicum, interaction with salmonellae and other gram-negative bacteria, 722
Schistosomiasis associated with salmonellosis in vivo and in vitro, 722
Scrapie, transmission in hamsters, 971
Screening method for *E. coli* O157:H7, use in a 12-month stool survey, 775
Septic arthritis, treatment of experimental infection with *E. coli* with ciprofloxacin, 811
Serological markers for HBV replication in adult carriers in an endemic area, 566
Serotyping of human retroviruses, characterization and prevalence by solid-phase immune electron microscopy, 1143
Serovars of *C. trachomatis*, multiple, in genital infections, 985
Serum bactericidal activity, natural, to *N. meningitidis* in disseminated infections, 1332
Sexual transmission of hepatitis B, 231
Sexually transmitted disease
association of CMV infection with sexual activity, 597
geographic variation among isolates of *T. vaginalis*, 979
screening for *C. trachomatis* infections in an inner-city population, 419
Shigella dysenteriae type 1, and *S. flexneri*, changing pattern of resistance in Bangladesh, 1114
Shigella septicemia, prevalence and implications, 784
Shigella serotypes, changing pattern of resistance to co-trimoxazole and ampicillin in Bangalore, 1348
Sickle cell disease, relation between serum opsonic activity for *S. pneumoniae* and complement function, 701
Skin testing, intradermal, for immunity to varicella-zoster virus, 869
Slow virus disease, role of prions, 431
Slow viruses, transmission of scrapie in hamsters, 971
Snow Mountain agent, associated with gastroenteritis in Vermont, 834
Spiramycin, unsuccessful in treatment of enteritis due to *I. belli*, 1336
Sputum culture and gram stain for diagnosis of bacterial pneumonia, 1096
Sputum examination, accuracy, for the diagnosis of pneumococcal pneumonia, 1097
Staphylococci, coagulase-negative, as a cause of nosocomial intraabdominal abscesses, 1091
Staphylococcus aureus
comparison with susceptibility of group B streptococci by oxygen metabolites, 323
effect of magnesium on production of TSST-1, 618
infections, new serological assay using ELISA, 286
killing mediated by interaction between monocytes and penicillin G, 521
promotes production of an inhibitor of neutrophil chemotaxis, 24
Staphylococcus epidermidis
infection, opsonic defense in the premature neonate, 930
isolated in an outbreak of prosthetic valve endocarditis, 50
Stool blot technique with DNA probes for detection of enterotoxigenic *E. coli*, 1087
Streptococci, group B, comparison with susceptibility of *S. aureus* to killing by oxygen metabolites, 323
Streptococcus faecalis, and viridans streptococci as causes of experimental endocarditis in rats, 83
Streptococcus pneumoniae
experimental infection in mice, disruption of inflammatory response by digoxin, 14
penicillin tolerance in multiple drug-resistant natural isolates, 365
serum opsonic activity related to complement function in

sickle cell disease, 701
Sulindac, effects on neutrophil adherence, 690
Surface antigens and excretory-secretory products, differences in 19 isolates of *Giardia*, 1166
Susceptibility testing in nonpulmonary mycobacterial infections, 500

T cells
effector, mediating antigen recognition as defense against leishmaniasis, 1057
subpopulations, shift in subpopulation sizes in CMV-induced mononucleosis, 198
subsets in acute toxoplasmosis, 424
suppressor, high number in circulation associated with oral carriage of *C. albicans*, 1356
Tchoupitoulas virus, isolated from a feral rat in New Orleans, 126
Teenagers and transmission of CMV in Texas, 1350
Tetanus toxin, inhibition of secretion of lysosomal contents from human macrophages, 922
Tetracycline, effect on the attachment of enterotoxigenic *E. coli* to porcine small-intestinal cells, 1032
Tetracycline-streptomycin vs. co-trimoxazole for treatment of human brucellosis, 1358
Tetrazolium salt MTT, for use as a rapid colorimetric assay of fungal viability, 938
Tick vectors, transmitting Lyme disease and babesiosis simultaneously, 473
Tick-borne encephalitis in Central Europe, assessment of risk, 650
Toxic-shock–syndrome toxin-1, production by *S. aureus* and effect of magnesium, 618
Toxoplasma gondii antigens, IgM and IgG antibodies in mothers and their congenitally infected newborns, 1020
Toxoplasmosis
T cell subpopulations in acute infection, 424
treatment with difluoromethylorinithine and formycin B, 1101
Trachoma, workshop report on research priorities, 383
Transmission of CMV in day care centers, molecular epidemiology, 760
Transplantation
and reactivation of latent CMV infection, 625
bone marrow
and infection with VZV, 1324
subsequent infection with VZV, 1172
heart or heart-lung, subsequent infection with CMV in patients receiving cyclosporine, 1182
kidney, source of murine CMV in mice after receipt of an allograft, 1192
lymphoma and lymphoproliferative lesions developing after, role of primary EBV infection, 876
Trichomonas vaginalis, geographic variation among isolates, demonstrated by monoclonal antibodies, 979
Trimethoprim-sulfamethoxazole
compared with ceftriaxone for treatment of chancroid in Thailand, 1002
increasing resistance in *E. coli* isolates from developing countries, 1107
resistance in *S. dysenteriae* type 1 in Bangladesh, 1114
Trypanosomes, mechanisms of antigenic variation, 855
Tuberculosis, human, radiation-sensitive antigen-specific suppression by monocytes, 171
Typhoid, mouse,
caused by salmonellae of differing virulence, relapse after cessation of antibiotic therapy, 1044
natural resistance controlled by genes within the major histocompatibility complex, 1050

Urine, osmoprotective properties for bacteria, 1308
Uromucoid, decreased excretion in the elderly, 653

Vaccination
against influenza A, dose response to Washington/897/80 (H3N2) reassortant virus in humans, 225
against poliovirus, secretory and serum immunoglobulin class-specific antibodies, 1238
for adults, 1
with Towne strain of CMV does not induce latency, 395
with aerosolized chick embryo fibroblast measles vaccine, effectiveness in older infants, 1231
with glycoproteins of human parainfluenza type 3 virus, characterization and evaluation, 1219
with live varicella vaccine, Perspective, 859
with varicella vaccine, responses compared with those of naturally infected patients, 863
Vaccines
against *H. influenzae* type b, capsular antigens covalently or noncovalently associated with protein, 634
to influenza A virus, use of live cold-adapted vs. inactivated whole virus in seronegative children, 1212
a new rhesus diploid rabies vaccine (adsorbed), derived from FRhL-2 cells, 204
Vaginitis, nonspecific, and vaginal redox potential, 379
Vaginosis, bacterial, and vaginal redox potential, 379
Varicella vaccine, live attenauted, Perspective, 859
Varicella, vaccine recipients compared with naturally infected patients, 863
Varicella-zoster virus
determination of immunity with an intradermal skin test, 869
determination of infection and immunity with an ELISA, 1349
infection after bone marrow transplantation, 1172, 1324
neutralization by human monoclonal antibodies, 280
Vibrio cholerae, comparison of rehydration solutions and maintenance therapy in cholera patients in Jakarta, 1159
Viral action, cytopathology without cytolysis, 665
Viral infections in childhood leukemia, 266
Viral inhibition of lymphocyte proliferation by HSV, 441
Virucidal paper handkerchiefs, effect on transmission of experimental rhinoviral infection, 403

Whooping cough, characterization of two adhesins of *B. pertussis*, 118
Workshop report
onchocerciasis, 389
trachoma, 383

Zoster, significance of specific IgA antibodies in serum as early diagnosis, 230
